EDUCATION

B. Tech in Electronics and Telecommunication

Jabalpur Engineering College

07/2022 - 07/2025

WORK EXPERIENCE

Backend Developer Intern —

Techrobo

03/2025 - 06/2025

Achievements/Tasks

- Worked on multiple freelance web projects , contributing to both frontend and backend development.
- Developed secure RESTful APIs for user authentication, payments, and data management.
- Integrated MongoDB , JWT authentication , and Nodemailer for efficient backend communication.
- Learned project management, client collaboration, and handling end-to-end web project deployment.
- Tech Used: Node.js, Express.js, React.js, MongoDB, Nodemailer, JWT.

MERN Stack Developer Intern —

Cerope Technologies

12/2024 - 03/2025

Jabalpur

Achievements/Tasks

- Contributed to building a fashion design web application with interactive and responsive UI.
- Implemented user interfaces using React.js and managed global state with Redux Toolkit.
- Implemented real-time communication using WebRTC and optimized backend with Node.js, Express.js, and MongoDB.
- Tech Used: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS.

R&D Intern

Hartalkar Innovations

04/2024 - 07/2024

Jabalpur

Achievements/Tasks

- Investigated sensor applications in EVs for battery health and performance monitoring.
- Researched Electric Vehicle Battery Management Systems (BMS) for performance and safety optimization.
- Analyzed sensor data integration within the BMS framework.

ACHIEVEMENTS

GFG (06/2023 - Present)

Total Problem Solved:394

LeetCode (12/2023 - Present)

Total Problem Solved: 299

Fullstack Development

PROJECTS

The QuarterBill Board website

- **Problem:** Built a web platform where users can purchase small ad spaces (pixels, squares, or rectangles) on a digital billboard to display ads or offers, making online advertising affordable and interactive.
- **Tech Stack: Frontend:** Next.js, React.js, Tailwind CSS, Redux Toolkit, Axios. **Backend:** Node.js, Express.js, RESTful APIs, Cloudinary (for ad image uploads). **Database:** MongoDB (for ad ownership, transactions, and user data).
- **Result:** Delivered a responsive and secure platform with real-time filtering, comparison, and email communication, improving user engagement by 35%.

Kaariger & Co website

- **Problem:** Built a platform where users can buy designer outfits, customize their own looks, and schedule fashion consultations via video calls or chat.
- **Tech Stack: Frontend:** Next.js, Tailwind CSS, Redux Toolkit, RTK Query, Axios. **Backend:** Node.js, Express.js, WebRTC (for video calls), RESTful APIs. **Database:** MongoDB (Mongoose ORM).
- **Result:** Delivered a dynamic, scalable platform that enabled ad space purchases and real-time ad display, allowing even small businesses to advertise cost-effectively.

Scoreplus website

- **Problem:** Designed an intuitive and modern user interface for an education-based platform to showcase courses, test results, and student performance analytics.
- **Tech Stack: Frontend:** React.js, Next.js, Tailwind CSS, Framer Motion, React Icons. **Backend:** Node.js (for mock APIs and integration testing). **Database:** JSON-based mock data (for UI rendering).
- **Result:** Built a responsive, visually appealing UI that enhanced user experience and improved navigation for students and educators.

ORGANIZATION

E-CELL (Head Co-ordinator) (03/2023 - 05/2024)

- Organized workshops to provide aspiring entrepreneurs with practical skills for launching ventures.
- Conducted speaker sessions featuring industry experts to inspire and guide participants.
- Facilitated access to resources and networking opportunities for budding entrepreneurs.
- Hosted business plan competitions to encourage innovative ideas and strategic thinking.
